

SeCorrPhon

AC 200 receiver

1 Purpose

SeCorrPhon is a system for the location of water leaks and water pipes.

The **SeCorrPhon** system can be used for:

- Acoustic leak detection (**leak detection**)
- Acoustic pipeline location (**pipe location**)
- Correlative leak detection (**correlation**)

2 Intended use

The **SeCorrPhon** system is intended for professional industrial and commercial use. The appropriate specialist knowledge is required to operate the system.

The system must only be used for the applications specified in section 1.

3 System description

The following documents describe how to use the system and operate the receiver:

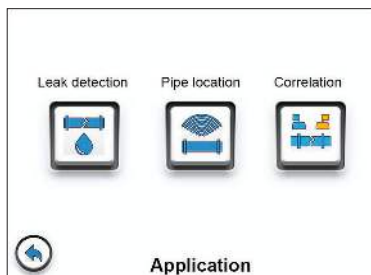

- **AQUAPHON A 200** operating instructions
- **SeCorr C 200** operating instructions

Special features are explained below.

4 Special features

4.1 Application menu

The **application** menu of the **AC 200** receiver differs from that described in the **AQUAPHON A 200** operating instructions.

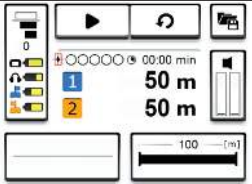

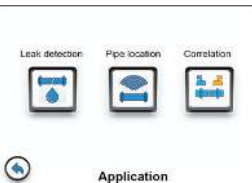

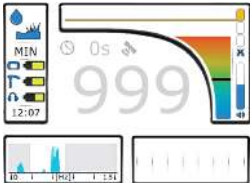

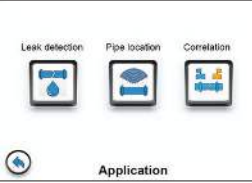

Application menu for AC 200

4.2 Behaviour of the receiver when switched on

Whether one of the main views or the application menu appears after switching on the **AC 200** receiver depends on the application:

- Application that was set before last switch-off
- Accessories (connected or not when switched on)

Last application	Switching on without accessories	Switching on with accessories
Correlation		
Leak detection or pipe location		<p>With accessories for leak detection/pipe location¹⁾²⁾:</p>  <p>With accessories for correlation:</p> 

¹⁾Described as a **direct startup** in the **AQUAPHON A 200** operating instructions.

²⁾After switching on: In the main view, use the icons on the **Settings** button to check whether the required application has been set correctly.
